

Water Test Information Sheet

Please print this form and answer the questions and place this sheet inside your US Postal package (ONLY MAIL PRIORITY MAIL) along with your water sample. Only use a 12 oz disposable drinking water bottle and only fill the bottle half full. Tape the cap on to ensure no leaks occur. It's also a good idea to place the bottle inside a zip lock baggie. Your sample should only be un-treated water, and taken before it goes through any treatment equipment.

Name _____

Your Email Address (**Please Print Clearly**) _____

Please Check One: Municipal Water _____ Well Water _____

Size of plumbing where you plan to install a new system? (Circle One) ½" ¾" 1" Larger?

Service flow GPM (Gallon Per Minute of your plumbing system) _____ *If you don't know this please see directions below.

Circle Existing Water Problems You Have: Limescale Buildup Iron/Rust

Are you interested in removing the hardness from your water or simply treating the hardness so it will not create limescale? _____

Please mail your sample Priority Mail to:

FilterWaterDirect LLC

P.O. Box 194 Lakeview Arkansas 72642 Tel# 316-640-2237

brad@filterwaterdirect.com

*To test the GPM service flow of your home, using two (2) five gallon pails and a timer, see how many gallons of water you get from a hydrant in exactly one minute. This information is important for iron system sizing.

Tape the cap before placing the printed form and bottle into the mailing box
